

2.3.8. Bagged Finished Product Storage

Standard

Are bagged finished products stored in a manner that does not cause product damage and enables clear identification?

Reason

To ensure bagged finished products are clearly identified and stored in the correct manner.

What is Acceptable?

Clear identification of bagged finished product is required according to Fact Sheet 8.2.6. Bagged finished product should be stored in the allocated storage area or storage control program (Fact Sheet 2.3.2 & 2.3.3). The storage area must be maintained according to Fact sheet 2.3.1, particularly for pest management.

Considerations for storage:

- Store according to a FIFO/FEFO system (Fact Sheet 2.3.6).
- No products stored directly on the floor.
- If palleting system used, ensure they are checked for quality (ensure pallet splitting does not cause damage to bagged finished product, Fact Sheet 8.2.9).
- Segregate feed according to RAM, Medicated or other status. This may be by different coloured labelling, or zoning.
